

YFMA 520

Compact, Heavy duty, Oil-heated, Automatic Feeding/Sheeting Celloglazer

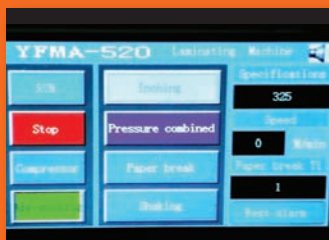

A sophisticated and versatile machine for Digital and B2 format offset printers

Max Size	540x760mm
Min Size	210x297mm
Paper weight:	120-500g
Max Speed	0-35m/min
Power of machine	15 KW
Machine Size	2100x1300x1450mm
Total Weight	800kgs
Laminating temp	normally~130 with oil heating

Outstanding features:

- Oil free vacuum pump on stream feeder with both separating and forwarding suckers
- Servo-controlled overlap +/- 2mm, and missing sheet detection
- Colour touch screen interface, programable for sheet size and overlap
- Oil heated for stable and precise PID electronic control of temperature
- Film slitting and perforating system on feed roll
- Sheet decurling device for production of flat laminated sheets
- Strong pneumatic laminating pressure
- Pneumatic film tension brake
- Swing-away film loading onto airshaft
- Whole machine is easily moved by pallet trolley for convenient storage in limited spaces

touch screen control
