

# HB 420 Auto-Punch

PH: 0412 720 060

## Characteristics

HB-420 auto-punching machine is the exclusive equipment of the paper's punch , mostly used in the calendar ,notebook ,exercise book ,gray cardboard and PP board etc ,it can't be used to punch the steel and other things .

## Specifications

Auto punching machine adopts the stepping-moter and can change the thickness.The paper would be send into the punching-mould through the conveyor, after adjusting the paper to align by modulating the three sides of paper at the same time ,then punching .After punching the paper would be auto-sent to the container in order .The size of paper and margin could be adjusted .By changing the different mould we can punch the different size of hole .

Main Specifications:

Min punching size for stiff cover	148*120mm
Max punching range for inner-sheet,	420*420mm
Min punching range for inner-sheet,	120*120mm
Max punching thickness	2mm
Max paper stack height	500mm
Max working speed (inner)	4800-7200times /hour
Max working speed (stiff cover )	1800-6000times /hour
Paper Specifications	50-250g/m <sup>2</sup>
Power	AC380V/3PH/50HZ/3KW
Machine size	2200*1000*1300mm
Weight	800kg
Air compressed	4-6bar
Air Compressor(Excluded )	0.37kw
