

Multifunctional Automatic Casing In Machine

Multifunctional Automatic Casing In Machine is a totally new bladeless casing-in machine, for producing square back books with block thickness ranging from 5-30mm at speeds around 900 books per hour. The shingled cases are fed into the book hopper with the outside facing down, the spray gluing on the cases, when a glued case is correctly aligned, a book block is fed and calibrated brought over the case, then close the case, the whole book will be flat pressed and nipping. The machine can achieve a net output of 800 books per hour. Make ready is fast and simple thanks to the MCS/PLS control unit

Max. Cover Size.....	400×760mm
Min. Cover Size.....	110×195mm
Max. Book Block Size.....	382×320×30mm
Min. Book Block Size.....	100×95×5mm
Book Block Thickness.....	5-30mm
Speed.....	900books/h
Precision.....	±0.5mm
Power.....	220V, 20kW
Weight.....	3000kg
